Innovations in medical surgery and therapy - this is what we are committed to.

Leading medical technology companies around the world rely on the 3D navigation technologies from NDI - the market leader for more than 20 years. Our competence as an innovative high-tech company supports the implementation of modern, digital solutions in medical fields of application and is a central component of our success.

INSIDE

People work for NDI at four locations around the world. The cultural diversity in our successful company and the requirements of our global customers ensure a motivating work environment. The knowledge, enthusiasm and experience of our employees are essential for our success. We know each other by name - including our colleagues in Canada, the USA and Hong Kong. We trust, respect and are honest with each other.

In our Research Department, we offer tasks with a high level of practical relevance and plenty of scope for your creativity and initiative:

TASKS

- You design and optimize our system components, field generators, measurement electronics and sensors for our electromagnetic measurement system for medical technology
- You are enthusiastic about new technologies and come up with ideas to use them for position determination
- You help the performance of our systems by developing future-oriented algorithms
- You master the description of magnetic fields and the development of methods to improve accuracy in electromagnetically disturbed environments in your sleep

PROFILE

- The most important thing is a degree in electrical engineering with a focus on electronics
- Analog and digital signal processing is one of your great strengths
- Industry experience in device or sensor development would be great, ideally in measurement technology
- You are on a first-name basis with magnetic fields and their mathematics
- Your experience in programming is good and you are fit in data analysis and statistics
- You are fluent in German and English to be able to communicate with our colleagues anywhere in the world
