## QUESTIONS?

07732 82 34 - 144

www.ndieurope.com

### Innovations in medical surgery and therapy - this is what we are committed to.

Leading medical technology companies around the world rely on the 3D navigation technologies from NDI - the market leader for more than 20 years. Our competence as an innovative high-tech company supports the implementation of modern, digital solutions in medical fields of application and is a central component of our success.

### INSIDE

People work for NDI at four locations around the world. The cultural diversity in our successful company and the requirements of our global customers ensure a motivating work environment. The knowledge, enthusiasm and experience of our employees are essential for our success. We know each other by name - including our colleagues in Canada, the USA and Hong Kong. We trust, respect and are honest with each other.

### TASKS

For our Manufacturing department we are looking for you to support our team with a varied range of tasks:

- Repair and service as well as handling customer complaints are at the top of your agenda: You will search for, analyze, and rectify faults in electronic systems, modules with analog and digital electronics, sensors, and sensor assemblies.
- Your tasks will also include analyzing and repairing products in-house - this is where we rely on your expertise in blocking and releasing material
- We are also happy to place the organization and management of our restricted warehouse in your hands
- And of course, the documentation of your work is also part of it: many of these processes also have to be recorded and processed in the ERP system or a repair report has to be created
- You would like to take over the function of a measuring equipment representative? - that would be great!

### PROFILE

- You have completed training as an electronics technician for devices and systems or have a degree as an electrical engineering technician in your pocket
- Due to your several years of experience, you can easily take over the repair of electronic articles and the error analysis - also the handling of electronic articles such as printed circuit boards is not new territory for you
- You bring along know-how in hardware and component knowledge and also in analog and digital electronics
- Creating statistical evaluations and dealing with an ERP system comes easily to you
- For the communication with our internal and external contacts you bring good German and English skills in word and writing
