www.ndieurope.com

Innovations in medical surgery and therapy - this is what we are committed to.

Leading medical technology companies around the world rely on the 3D navigation technologies from NDI - the market leader for more than 20 years. Our competence as an innovative high-tech company supports the implementation of modern, digital solutions in medical fields of application and is a central component of our success.

INSIDE

People work for NDI at four locations around the world. The cultural diversity in our successful company and the requirements of our global customers ensure a motivating work environment. The knowledge, enthusiasm and experience of our employees are essential for our success. We know each other by name - including our colleagues in Canada, the USA and Hong Kong. We trust, respect and are honest with each other.

For our Manufacturing department we are looking for you as a committed personality:

TASKS

- As a product owner, you will put together the work packages for our production stream and also enjoy working with them yourself
- You will introduce new production processes and new production equipment such as inspection and test stations as well as assembly processes at our site in Radolfzell and also partly at our suppliers' sites
- Existing processes and current equipment are looking forward to improvements by you - your hands-on mentality and out-of-the-box thinking will serve you well here
- You are also a competent contact person for our inspection and test equipment at the supplier and convince with your expertise

PROFILE

- The basis for your know-how is a degree as a technician in the field of electronics or a university degree with an electrotechnical background.
- You have already transferred several years of developed products into a successful series production or have a lot of experience as a Manufacturing Engineer
- If you have also done project management, that would be great, but not a must
- You are optimally prepared for the international environment with our Canadian and American colleagues thanks to your good knowledge of German and English.
- You can additionally program a bit or know something about PLM tools? Then you are a perfect fit for us!
