www.ndieurope.com

Innovations in medical surgery and therapy - this is what we are committed to.

Leading medical technology companies around the world rely on the 3D navigation technologies from NDI - the market leader for more than 20 years. Our competence as an innovative high-tech company supports the implementation of modern, digital solutions in medical fields of application and is a central component of our success.

INSIDE

People work for NDI at four locations around the world. The cultural diversity in our successful company and the requirements of our global customers ensure a motivating work environment. The knowledge, enthusiasm and experience of our employees are essential for our success. We know each other by name - including our colleagues in Canada, the USA and Hong Kong. We trust, respect and are honest with each other.

Your heart beats for the field of quality management? Then we look forward to receiving your application!

TASKS

- Most of the time, you will be responsible for resolving supplier quality issues on a long-term basis. To do this, you will work closely with suppliers by submitting complaints and evaluating the resulting supplier corrective action plans
- You enjoy planning and conducting supplier audits and are happy to take responsibility. This allows you to monitor whether the quality standards are being met
- Because you are a strong communicator, you regularly carry out supplier evaluations with your colleagues from Purchasing
- Administration is also part of the job here, as you will enter change notices by our suppliers and then coordinate the NDI internal evaluation and communicate back to the supplier in the usual clear and understandable way
- Of course, you also always keep an eye on the certification status of suppliers and are directly involved in the selection of new suppliers - your opinion counts!
- You see yourself as a driving force for the introduction and conclusion of appropriate quality assurance agreements with suppliers

PROFIL

- You are already familiar with supplier quality management based on ISO 13485 or ISO 9001 because you have already gained several years of experience in these areas - the basis for your knowledge is a completed apprenticeship or university degree.
- Due to your previous positions, clear and certain communication with suppliers is important to you and you are not afraid to share your point of view and to demand information
- You have gained a good technical understanding through your experience and can think logically and in cause-effect chains
- You have a structured and independent way of working, combined with a hands-on mentality
- You have a good command of German and English in order to be able to communicate with our colleagues all over the world
